

Dhritiman Bhattacharjee

Product Designer & Frontend Developer | C++, Java

Kolkata, West Bengal, India | +91-9933586072 | dhritimanbhattacharjee.personal@gmail.com

SUMMARY

Final-year Computer Science student at Academy of Technology (CGPA: 7.7) focused on Product Design and frontend development. Experienced in creating clean, intuitive digital experiences with Figma and creative design tools, supported by HTML, CSS, JavaScript, React, C++ and Java.

DESIGN & TECHNICAL SKILLS

Product Design: Figma, Adobe XD, Canva, Kittl

Creative Tools: Photoshop, Adobe Illustrator, Adobe Fresco, Procreate

Languages: C++, Java, HTML, CSS, JavaScript

Frameworks/Libraries: React | **Database:** MySQL | **Version Control:** Git, GitHub

CS Fundamentals: Data Structures & Algorithms, Object Oriented Programming, Operating Systems, DBMS, Computer Networks

PRODUCT DESIGN PROJECTS

Apertre 2.0 Website (2026)

Designed a modern event website experience with clear information hierarchy, intuitive navigation, responsive layouts, and a cohesive visual system.

[View in Figma](#)

Apertre Event Materials Page (2026)

Designed an organized event-materials experience with structured content, consistent visual language, accessible layouts, and easy resource discovery.

[View in Figma](#)

Xposure Web Page (2026)

Created a visually engaging web page using strong typography, balanced layouts, clear content hierarchy, and a cohesive digital experience.

ADDITIONAL PROJECT

Persona Teach: A Context-Aware AI Teacher Persona System — 2025 – Present

Description: A context-aware AI teacher persona system that simulates subject-matter expertise and teaching style of real educators, delivering personalized, domain-restricted academic guidance via NLP and dynamic LLM routing.

Tech Stack: Python, NLTK, spaCy, OpenAI API, Gemini API, Claude API, Chatterbox

- Built an NLP pipeline using NLTK and spaCy to tokenize and semantically analyze user queries.
- Designed relevance scoring and dynamic routing across optimized LLM APIs.
- Developed guardrails for out-of-domain queries and integrated voice cloning for text and audio responses.

ACHIEVEMENTS

- Selected for the NVIDIA Inception Program.
- Recognized for building and scaling an AI-driven startup, gaining access to technical resources, mentorship, and startup support.
- Patent Filed: "System and Method for Context-Adaptive Multi-Modal AI Persona Generation with Dynamic Model Routing and Ethical Control" — 2026.
- Published in the Indian Patent Journal (Persona Teach).

EDUCATION

Academy of Technology — Hooghly, West Bengal, India | 2023 – Present

Bachelor of Technology in Computer Science & Engineering | CGPA: 7.7 (up to 6th Semester)

Memari V.M. Institution (Unit-1) — Memari, West Bengal, India | 2020

Class XII (WBCHSE) | Percentage: 90.4%

Memari V.M. Institution (Unit-1) — Memari, West Bengal, India | 2018

Class X (WBBSE) | Percentage: 93.8%

PRODUCT DESIGN CASE STUDIES

01 — Apertre 2.0 Website

Problem / Goal: Create a polished event-focused website that makes key information easy to discover while presenting Apertre 2.0 with a consistent visual identity.

Role: Product Designer — information architecture, visual hierarchy, responsive web layouts, navigation, typography and UI presentation.

Design Process: Structured the experience around clear content hierarchy and user-oriented navigation. Focused on reducing visual clutter, maintaining consistent spacing and typography, and establishing a coherent visual language.

UX / UI Focus: Information architecture, navigation, responsive layout, typography, spacing, visual hierarchy, component consistency and accessibility-aware presentation.

[View in Figma](#)

02 — Apertre Event Materials Page

Problem / Goal: Organize event resources and materials into a clear web experience so users can quickly understand available content and locate the resources they need.

Role: Product Designer — content organization, layout design, visual hierarchy, navigation and responsive UI design.

Design Process: Approached the page as a resource-discovery experience: grouped related information, established clear scanning paths, and used consistent layout rules to make materials easier to distinguish and access.

UX / UI Focus: Content hierarchy, findability, scannability, spacing, typography, reusable UI patterns and responsive presentation.

[View in Figma](#)

03 — Xposure Web Page

Problem / Goal: Build a visually engaging web experience that communicates Xposure content with strong hierarchy while keeping the interface balanced and easy to scan.

Role: Product Designer — visual direction, page composition, typography, content hierarchy, layout and web UI refinement.

Design Process: Focused on visual rhythm through typography, spacing, section hierarchy and balanced composition, combining visual impact with straightforward content organization.

UX / UI Focus: Visual hierarchy, typography, composition, spacing, content grouping, responsive web thinking and consistent interaction patterns.
